

ATC-800+ Package 3

You're ATC-800+ Package 3 has been professionally wired up and is now ready to use.

If you wish to attach your ATC-800+ to the wall then you will find a small bag which contains the wall mounting brackets and screws.

Please refer to the Operating Instruction leaflet which accompanies your purchase on how to operate your ATC-800+.

The 2 extension sockets attached to your ATC-800+ are where you plug in the devices you wish to control. The sockets will either be labelled as Heating or Cooling or they can be identified by the colour. If you have a black socket, then this is for your cooling devices and if the other socket is white then this will be for your heating devices.

If you have any further questions please just email us at sales@forttex.com.
